ADDITIONAL INFORMATION

FINAL YEAR PROJECT

01/08/2022 – 01/01/2023
Quick Commerce

Quick Commerce is a comprehensive cloud-based web application designed to cater to the specific needs of restaurant startups. With a user-friendly interface and powerful features, Quick Commerce offers ready-made templates paired with a robust Customer Relationship Management (CRM) system. This solution leverages Laravel as its backend framework, backed by MySQL as the database, to ensure seamless functionality and data management.
Key Features:
1. Ready-Made Templates: Quick Commerce simplifies the process of setting up a restaurant's online presence by providing a variety of customizable templates for websites and online menus.
2. CRM Integration: The integrated CRM system enables restaurant owners to manage customer data, reservations, feedback, and orders efficiently. It helps build strong customer relationships and streamline operations.
3. Vendor and Restaurant Tracking: Quick Commerce offers real-time tracking capabilities for vendors and different restaurants. This feature ensures smooth coordination between restaurant owners and their suppliers, enhancing supply chain management.
4. Subscription Module: To accommodate various business models, the application offers flexible subscription modules. Restaurant startups can choose between monthly and yearly subscription packages, allowing them to scale their services according to their needs.
5. Secure Payment Integration: Quick Commerce prioritizes data security and offers secure payment integration options for seamless and safe online transactions.
6. Reporting and Analytics: Restaurant owners can access detailed reports and analytics to gain insights into their business performance, helping them make informed decisions and optimize operations.
Quick Commerce empowers restaurant startups with the tools they need to thrive in today's competitive digital landscape. It offers a holistic solution that combines the convenience of templates, the power of CRM, and the flexibility of subscription packages, all backed by a secure and efficient cloud-based infrastructure.
